

To Whom It May Concern

Ankara, February 8, 2012

World Skal Movement, which began in 1934, has promoted tourism activities by bringing tourism professionals together under its umbrella. Today, it is the largest international institution with over 22.000 tourism managers members from 85 countries.

Among the members of Ankara Skal Institution-member of Skal Institutions Federations of Turkey-there are the owners and managers of organizations working in various areas of tourism industry, and representatives of educational institutions.

The development of health sector in capital city Ankara, which is one of the leading cities in our country with its historical texture, and both underground and surface prosperities, is very important for our sector.

Ankara, with its historical heritage and natural prosperities, has an importance in the development of health tourism, which is one of the purposes of Turkish government by 2023.

As members of our institution, Aloha Group owners, namely Metin Güngör and Gamze Önsoy Güngör, have contributed a lot to various fields of the sector through successful projects within Turkey, and have the experience and knowledge to develop and finalize good quality projects.

Aloha Group will promote sustainable health tourism both in Ankara and Turkey while aiming for success in its sound investments, including the hospital and clinical guesthouse projects.

As the Ankara Skal Institution, efforts of Aloha Group to develop health tourism in Ankara are highly appreciated and fully supported, and we believe that their work will contribute a lot to development of the tourism industry in Ankara.

Regards

Aykut Pekcan

President

Skal International Ankara
